### Q&A

Can not link with iPedal?
1) Power off. After couple seconds, power on again.
2) Use Melodyin "setting", pair again.
3) Use Tablet to release the app from memory Sometimes, one of 3 alternative could resolve your problem.

- Can not find your own iPedal? In Melodyin App, use "setting" to pair iPedal. (Refer to page 14)
- No LED blinking as power on? Please change to new battery.
- Why can not we use other App? As each App has its software setting, we will work with more and more App companies. In the future, you could see more and more App for iPedal.
- How to make sure that iPedal will not run out of battery as your show? As LED is not bright, please change to the new battery. For your formal show, please use new batteries. Normally, you could use iPedal continuously for more than 10 hours.
